

Sidney D. Drell Academic Award

INSA Achievement Awards

Instructions and Overview – Please Read Carefully!

The **Sidney D. Drell Academic Award** recognizes the accomplishments of early- and mid-career academic professionals working on intelligence, defense, and homeland security issues.

ELIGIBILITY

Nominees must be full-time graduate students, untenured professors/instructors, or junior-/mid-level researchers at an accredited academic institution. Individuals enrolled in a part-time degree program are not eligible for the award. **Staff of National Labs, FFRDCs, or other organizations performing work under contract for the government should apply for the Edwin H. Land Industry Award.**

COMPLETING THE FORM

Please focus the nomination on work that the nominee has undertaken over the past three to five years.

It is critical that the selection committee be able to assess the individual contributions of the candidate being nominated – not the achievements of an office or mentoring program. Be sure to reference the following selection criteria below when completing the nomination form.

- **Question One** asks for details about the nominee’s office or project and his/her role in it. This information should provide context for the subsequent questions, which ask for specifics regarding the nominee’s actions, accomplishments, and impacts.
- **Questions Two and Three – the most important parts of the nomination** – please be as specific as possible in describing the nominee’s individual contributions to his/her organization’s mission, as well as to the goals of the intelligence and national security communities and to the national security of the United States.

While not required, if you would like to provide supplemental information (e.g., an endorsement from a mentor or a former supervisor), please limit to a single one-page document.

Selection Criteria

All nominees will be reviewed by the INSA Achievement Awards Committee using the following criteria. Nominations do not need to address every criterion listed below.

Academic accomplishments: Contributions to greater understanding of critical national security challenges and their application to government policy/legislative decisions and/or intelligence activities.

Teaching and Hands-On Mentorship: Experience sharing skills, expertise, and constructive feedback through classroom teaching and ongoing formal and/or informal mentoring relationships with students, peers, and junior colleagues.

Leadership: Performance that exemplifies the ability to work across organizational boundaries, understands national security and intelligence priorities, and meets the wide-ranging requirements of mission objectives.

Influence: Ability to influence others to accomplish the mission by providing purpose, direction and motivation.

Values: A commitment to the value of diversity, innovation, collaboration, resourcefulness and resilience.

Team-building: Experience leading, developing, and/or participating effectively in a team.

Personal Traits: Exhibiting intangible aspects of professionalism, including interpersonal communication skills, empathy, and the ability to gain the respect of one’s peers, subordinates, and superiors alike.

INSA Achievement Awards

2. ACCOMPLISHMENTS

Please describe the nominee's personal contributions to relevant research, academic dialogue, and/or classroom teaching. Explain the impact of the nominee's accomplishments, including their contributions to greater understanding of a critical national security challenge and their application to government policy/legislative decisions, intelligence activities, and/or the development of the future national security workforce. Please be as specific as possible in describing the impact of the nominee's activities to the defense, intelligence, national security, and/or homeland security communities. This answer will be weighted most heavily in the evaluation process. (400 words maximum)
